PROFESSIONAL SUMMARY

Software Engineering student with over 3 years of hands-on experience in developing full-stack web applications and scalable REST APIs. Skilled in designing efficient solutions and tackling complex technical challenges, with a strong interest in Artificial Intelligence and the integration of Machine Learning, NLP, and Large Language Models (LLMs). Eager to join a dynamic team, contribute to impactful projects, and continuously expand my technical expertise.

WORK EXPERIENCE

Software Development Intern | Box2Home

February 2023 – June 2023

- Developed and integrated frontend interfaces connected to backend APIs.
- Built an interactive map-based itinerary visualization feature.
- Contributed to a live production codebase in a professional company environment.
- Stack: React, Node.js, Express, TypeScript.

Web Development Intern | AXIA

July 2022 – August 2022

- Independently designed and developed a full parking reservation web application.
- Handled both frontend and backend development end-to-end.
- Stack: MongoDB, Express.js, React, Node.js (MERN Stack).

PROJECTS

AI-Powered HR & Career Guidance Assistant — Python · Django · Hugging Face · React

- Built a platform connecting recruiters and candidates with automated CV–job offer matching.
- Implemented NLP-based cover letter generation and CV enhancement using Hugging Face models.
- Developed AI-assisted mock interviews and automatic interview guide generation.
- Features include JWT authentication, user history, and automated candidate ranking.

Maison Glow – Intelligent E-Commerce Platform — React · Node.js · MongoDB

- Full-stack e-commerce platform: catalog, filters, wishlist, cart, orders, and payment tracking.
- Integrated an AI assistant providing personalized recommendations based on user behavior.
- Built a comprehensive admin dashboard for store management.

Internship & Thesis Defense Management Platform — Angular · REST API · Agile

- Agile team of 4: fully digitalized the internship and thesis management process.
- Designed an optimization algorithm for automatic defense scheduling based on teacher availability.
- Developed a RESTful API and an Angular frontend.

Event Booking & Management System — Node.js · JWT · Docker · SMTP

- Secure event reservation platform with JWT authentication and full admin dashboard.

- Automated email notifications via SMTP and containerized the application with Docker.

Diabetes Prediction System — Python · Scikit-learn · ML

- Data preprocessing, exploratory analysis, and feature selection via correlation analysis.
- Trained and compared multiple classification models; evaluated with accuracy metrics and confusion matrix.

TECHNICAL SKILLS

Languages	Python · Java · JavaScript · TypeScript
Backend	Django · Node.js · Express · Symfony · Laravel
Frontend	React · Angular · Material UI
AI & Data Science	Hugging Face · Scikit-learn · Machine Learning · NLP
Databases	MongoDB · MySQL
Tools & DevOps	Docker · Git · Postman

EDUCATION

Master's-level Engineering Degree in Software Engineering

ISSAT Sousse (Institut Supérieur des Sciences Appliquées et de Technologie) | 2024 – Present

Bachelor's Degree in Computer Science

ISSAT Sousse | 2021 – 2024

Baccalaureate – Mathematics

2021

CERTIFICATIONS

Power BI & Apache NiFi | Orange Digital Center | April 2026

- Created interactive dashboards with Microsoft Power BI.
- Designed automated data pipelines with Apache NiFi (ingestion, transformation, visualization).

LANGUAGES

Arabic Native	French C1	English C1
